Senior Business Analyst | AI-Enabled Business Analysis | Agile Product Delivery

navyach79@gmail.com | +91 7660974772 | Hyderabad, India | [Portfolio](#) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

---

Senior Business Analyst with 6+ years of experience delivering enterprise and digital products in Agile/Scrum environments. Experienced in translating business needs into actionable solutions, partnering with stakeholders and cross-functional teams, and driving initiatives from discovery through delivery and post-production support. AI-enabled Business Analyst leveraging *ChatGPT*, *Microsoft Copilot*, *Anit-Gravity IDE* and *Claude* to accelerate requirements analysis, documentation, user-story development, meeting summarization, and knowledge synthesis while maintaining business accuracy and quality. Brings a strong combination of business analysis, product thinking, process improvement, and hands-on experience.

## CORE COMPETENCIES & TOOLS

---

**Business Analysis:** Requirements Elicitation & Analysis | Stakeholder Management | Business Process Analysis | Gap Analysis | Impact Analysis | Business Rules | Functional Requirements | Data Validation | Business Rules & Validation Logic

**Requirements & Documentation:** BRD | FRD | User Stories | Acceptance Criteria | RTM | Functional & Non-functional Specifications | Use Cases | Process Flows | SOPs

**Agile & Product Delivery:** Agile | Scrum | SDLC | Sprint Planning | Backlog Refinement | Backlog Prioritization | Sprint Reviews | Retrospectives | Release Management | Product Roadmaps | Feature Prioritization

**Testing & Quality:** UAT Planning & Execution | Test Scenarios | Defect Management | Requirement Validation | Business Sign-off | Post-Production Support

**Process & Design:** Process Mapping | Wireframing | Prototyping | Figma | Balsamiq | Lucidchart | Draw.io | MS Visio  
Tools: Azure DevOps (ADO board) | JIRA | Confluence

**AI-Enabled Business Analysis:** ChatGPT | Microsoft Copilot | Claude | Prompt Engineering | AI-Assisted Requirements Analysis | AI-Assisted Documentation | Meeting Summarization | AI Productivity Workflows | Anti-Gravity IDE | Lovable.ai

**Collaboration:** Cross-functional Collaboration | Stakeholder Communication | Requirement Walkthroughs | Problem Solving | Analytical Thinking

## WORK EXPERIENCE

---

### Senior Business Analyst – AI-Enabled Business Analysis Jun 2025 – Aug 2026

*Deloitte (via Team Lease Digital Pvt. Ltd.) • IT Product / Services*

- Ramped up on a complex enterprise product within 1–2 weeks and contributed to live Agile sprints from day one by quickly understanding business process.
- Own end-to-end requirements analysis, including stakeholder workshops, BRDs, FRDs, user stories, and acceptance criteria.
- Manage and prioritize the Azure DevOps product backlog, conducting backlog refinement, monitoring ageing and dependencies, resolving requirement gaps, and ensuring sprint-ready user stories across active workstreams.
- Drive 90–95% on-time sprint delivery through Agile ceremonies, proactive blocker identification, and cross-functional stakeholder alignment.
- Lead UAT planning, defect triage, business validation, sign-off, and release coordination across workstreams.
- Conduct design reviews and support integration discussions by translating business needs into functional workflows and solution requirements. Collaborated with engineering, UX/UI, user research team and client partners to deliver the requirements.
- Maintain product roadmaps and feature priorities aligned with business objectives, stakeholder needs, and delivery timelines.
- Apply Generative AI and prompt engineering using Sidekick, Microsoft Copilot, and Claude to accelerate requirements analysis, user-story drafting, documentation, and meeting summarization.

- Integrate AI-assisted workflows into daily BA activities, reducing repetitive documentation effort and enabling greater focus on analysis, stakeholder engagement, and decision-making.

### **Business Analyst**Sep 2024 – Mar 2025

*Tradu*

- Collaborated with cross-functional teams and stakeholders to define, document, and validate requirements — improving operational efficiency by 30% and boosting product adoption rates.
- Acted as primary liaison between business stakeholders and technical teams — facilitating requirement walkthroughs, securing approvals on designs, and driving alignment across project milestones.
- Developed low-fidelity wireframes and interactive prototypes using Figma and Balsamiq; conducted iterative feedback sessions with stakeholders to refine designs against user and business goals.
- Applied Agile practices to drive iterative development cycles; facilitated sprint ceremonies, contributed to backlog grooming, and ensured timely delivery of business-aligned solutions.
- Led UAT planning and execution — created test scenarios, coordinated business testers, tracked defects, and provided post-go-live training and support to ensure smooth system adoption.

### **Business Analyst — Associate Process Leader**Nov 2022 – Sep 2024

*Brane Enterprises Pvt. Ltd*

- Gathered and documented requirements through on-site visits, stakeholder interviews, and structured brainstorming sessions; produced detailed BRDs and FRDs ensuring full traceability to business objectives.
- Translated complex business requirements into wireframes, low-fidelity prototypes, and DFDs to support development, design, and QA teams in understanding scope and expected behaviour.
- Collaborated with project teams on effort estimation, sprint planning, and timeline management; facilitated Agile ceremonies including standups, sprint demos, and retrospectives.
- Contributed to test case design, validation rule definition, and UAT coordination — ensuring delivered solutions met quality standards and business expectations.
- Developed comprehensive end-user training materials and conducted knowledge transfer sessions; performed regular project reviews to track progress and maintain alignment with client goals.
- Delivered BA support across multiple customer-specific domains including fleet management, supply chain (store operations), workshop management, and healthcare applications.

### **Business Analyst (Catalog Specialist)**Jun 2020 – Nov 2022

*Amazon Development Centre, India*

- Supported the Seller Enforcement Stage 1 enhancement project — automated data consolidation workflows, reducing processing time by 60% and cutting data entry errors by 35%.
- Assisted in the integration of 6 new marketplaces into the platform — gathered and documented requirements, coordinated cross-functional stakeholders, and validated integration outcomes.
- Elicited and documented requirements for keyword highlighting functionality in queues; collaborated with design and development teams to ensure effective and accurate implementation.
- Analyzed existing operational processes to identify improvement opportunities; developed and optimized SOPs, training materials, and process documentation for clarity and efficiency.
- Served as Subject Matter Expert (SME) during the seller enforcement process implementation; led knowledge-sharing sessions and actively participated in UAT to validate business requirements.
- Compiled and presented detailed data-driven reports and insights to stakeholders, enabling informed business decisions and continuous process improvement.

## **EDUCATION**

---

### **B.Tech — Electronics, Instrumentation & Control Engineering — CVR College of Engineering, Hyderabad**

2015 – 2019 | CGPA: 8.5 / 10

### **Intermediate — MPC — Sri Chaitanya Junior Kalasala**

2013 – 2015 | Score: 91.7%
